## Objective

Seeking job as Frontend Developer, remote or in Berlin.

## Skills

- HTML, CSS, JavaScript, SQL, Python (Basics)
- React, Bootstrap, jQuery, Node.js, Express.js
- Git, GitHub, Linux, Window, Jira, Visual Studio Code
- English, German

## Projects

- Weather Forecast

A Weather-forecast app using the OpenWeather API to display current temperature, humidity, windspeed, and air pressure. It also display the maximum and minimum temperature of the day and it show hourly forecast. The date and time are displayed using Javascript built-in-functions. It shows the weather details for one week.

- Dictionary (English-English)

It displays the definitions of the word which the user search. It also shows related images and synonyms. I developed this project with the help of React Framework. In this project, I used unpaid API so please search for small like moon, flower, hen ...etc.
