PROJECTS

Encoder

- Developed using TypeScript, React, Vite, and tailwindcss.
- Users can enter some text and encode it using URL encoding, Base 64 encoding, or generate a QR Code that can be scanned.
- History of all the previous usages are stored in local storage of quick access again.

Weather App

- Developed in React, and JavaScript using API provided by Open WeatherMap.
- Shows the current weather forecast for user's location.
- Users can also search and view the weather forecast for other locations.

Dictionary App

- Developed using React, JavaScript, and Bootstrap5.
- Users can search for a word and get the definition, usage example and images.
- I used third-party API's from Free Dictionary API to get definitions and Pexels API to get images.
